

CHC Solutions, Inc. supports individuals with special and/or complex healthcare needs through our care-coordination model — Continuum Connect. With Continuum Connect, patients, their families and caregivers don't need to worry about when medical supplies will arrive at their homes. We call our customers proactively each month to streamline the process for their reorder deliveries. We accept Medicaid, Medicaid Advantage, Medicare and most third-party insurances.

## Spina Bifida Program

Continuum Connect offers a specialized care-coordination program for individuals diagnosed with Spina Bifida. With the program, our customers only need to go to one place for their supply needs, and they have a dedicated product coordinator to guide them every step of the way.

The dedicated product coordinator works directly with patients diagnosed with Spina Bifida, so they truly understand the patient demographic and the supplies customers need. Plus, we work to ensure there are no unexpected out-of-pocket expenses!

We offer access to a wound, ostomy and continence nurse (WOC nurse) who can help patients with Spina Bifida order the correct quantities of wound care dressings and catheters. We also provide access to a registered dietitian and a respiratory therapist.

Continuum Connect carries the best and most frequently prescribed products for those with Spina Bifida. We offer a wide array of brand-neutral supplies from wound care and urology products to incontinence supplies. This includes:

- ▶ Advanced wound care dressings
- ▶ Incontinence supplies: Underpads, briefs, pull-ups and liners
- ▶ Urology supplies
- ▶ Nutritionals: Oral supplements and feeding pumps or supplies
- ▶ Adaptive equipment
- ▶ Hygiene and bathing equipment
- ▶ Bowel management systems

The Spina Bifida program is custom-tailored for those with this disorder that affects parts of the spinal cord and nervous system. We work to ensure customers have the products and supplies needed and a positive experience with Continuum Connect. Because we have decades of experience with patients who have special and/or complex needs, we know the best way to serve: by always putting the customer first.
